About Me

I'm a game developer with 2+ years of experience with strong foundation in Unity, C#, and OOP. I have also worked with JAVA and LibGDX. I am well versed in Programming Design Patterns as well as Data structures. Through self-learning, I've worked on several projects, building my skills in game design and development for mobile, WebGL, Fire TV and Windows.

Experience

Game Developer at Rendered Ideas

June 2026 - October 2026.

- Worked on several games for Amazon Fire Tv and Android games, On in house game engine made on java using LibGDX.
- Optimized companies flagship title Jungle Adventure 2 for lower end fire tv devices, By decreasing draw calls in multiple game features.
- Did crash fixes on multiple games for fire tv games such as Street Fight, Goon Fight, Alpha defense, Wobble crew resulting in crash reduction from 8-20 percent to 0-0.2 percent for these games.
- Collaborated with other designers and testers to improve games quality.
- *Fixing Bugs. and other issues.*

Unity Developer at HorizonX Playr

Nov 2025 - May 2026.

- Developing mobile games, Setting Up scripts, scenes and UI.
- Setting up IAPs, Ads and Analytics.
- *Fixing Bugs. and other issues.*
- *Collaborating with artists and designers to create fun mobile experiences.*

Unity Developer at Origami Games

Oct 2024 - Sept 2025.

- Developed multiple client-requested games across genres such as Idle, Tycoon, and Arcade (2D & 3D).
- Built core mechanics for an unreleased in-house title inspired by lara croft go. Used 3D array to build 3D turn based Grid system for game (Prototype Demo)
- **Led a 2-member developer team** to create the core system for this game, writing clean, reusable C# code with SOLID principles new features could be added easily.
- Created Editor tool to design levels faster for this game.
- Added new gameplay features, improved existing systems, debugged issues, set up scenes, and integrated UI and assets.
- Provided feedback on game design and functionality to enhance overall quality.

QA/Game Tester at Upsurge

Dec 2022 - Dec 2023

- Developed and executed detailed test cases for children's educational games on Android, WebGL, and Windows platforms.
- Conducted various testing types: Functional, Integration, Unit, Regression, and Performance.
- Reported and documented bugs with clear descriptions, reproduction steps, and supporting media.
- Collaborated with designers and developers to enhance game functionality and user experience.
- Applied minor bug fixes in Unity to improve game performance.
